State of Alaska
Anchorage, Alaska

Re: Opinion Letter

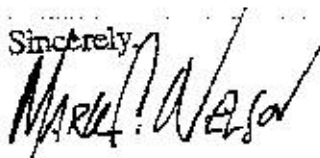

Dear Mr. Carr:

Thank you for assisting me over the telephone in making a determination as to overtime exemptions for our staff. The discussion surrounding "supervisors" as being exempt from overtime pay (premium pay) but yet have to be paid for all hours worked has been difficult to pull from the regulations.

Please respond in writing to give us a definition as to how it works and the cautions of classifying an employee as a supervisor. We can easily find the classifications for administrative, professionals and executives but do not see a clear path for the supervisors.

Thank you for your help.

Sincerely,

Mark C. Nelson

Anchorage, AK 99519-0747

Dear Mr. Nelson:

I have reviewed the information you have submitted documenting the duties of your Materials Supervisors. It appears that they are employed in a supervisory capacity as defined in 8 AAC 15.910 (14), which states:

... those primary duties performed by an employee who is employed solely for the purpose of regularly assigning and directing the activities of other employees; and is responsible for results of the work performed and; who does not perform duties regularly performed by the employees supervised, except for brief periods of time not to exceed 20 percent of the hours worked in the workweek; for the purpose of AS 23.10.060, "supervisory capacity" does not apply to an employee required by the employer to perform those activities on an intermittent or substitute basis during the course of employment.

As such, they are exempt from overtime under AS 23.10.060, which states in pertinent part:

Payment for overtime. (a) An employer who employs employees engaged in commerce or other business, or in the production of goods or materials in the state may not employ an employee for a workweek longer than 40 hours or for more than eight hours a day. This section does not apply to the employment of a person acting in a supervisory capacity. [Emphasis added]

(b) If an employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid.

APC0203

June 26, 1997

-2-

Mr. C. Nelson

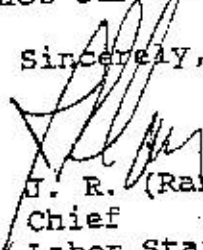

The more common exemptions for Administrative, Executive or Professional employees are found in AS 23.10.055. This exemption applies to both minimum wage and overtime. Since those types of employees are not entitled to a minimum wage, their salaries are considered compensation for any and all hours they may work.

The explanation as to why employees in a supervisory capacity must be paid for all hours worked is not found in the regulations. It must be pieced together from the statutes and court rulings. The U.S. Supreme Court has held that employees who are not exempt from minimum wage must be paid for all hours they are "suffered or permitted" to work.

Exempt administrative employees, for example, are paid for all hours worked, but are not guaranteed any minimum hourly rate. Employees working in a supervisory capacity must also be paid for all hours worked. The hiring agreement and pay practices for supervisors establish a contractual hourly straight-time rate of pay for the Materials Supervisors. They are statutorily and/or contractually entitled to be paid that rate for all hours worked, without any overtime premium, pursuant to the exemption stated in AS 23.10.060.

I hope this information is helpful. If you have any further questions, do not hesitate to contact our office.

Sincerely,

 J. R. (Randy) Carr
